Commercial portfolio

A full range of headlight bulbs, miniatures, and sealed beams.
Get name-brand recognition in commercial packaging.

Philips commercial portfolio provides more than just a white box program, you get the brand name recognition that is known worldwide.

The program includes a **complete offering of standard OE replacement lighting**, including a full range of headlight bulbs, halogen and

incandescent sealed beam headlamps, and miniature bulbs for both interior and exterior vehicle applications.

Our entire range of innovative 12V and 24V lighting solutions is engineered to bring more added value to your business while meeting the needs of your customers!

LongerLife commercial

Upgrade your commercial offering with Philips LongerLife products.

With longer lifetime, Philips LongerLife is the choice for drivers seeking to minimize maintenance on their vehicles, without compromising on light output.

Changing a lamp is a hassle and can be very time-consuming. Philips is committed to provide the highest quality standard lighting solutions to minimize this maintenance.

MasterDuty lighting

MasterDuty headlight bulbs are the latest innovation in commercial vehicle lighting, made especially for class 2-8 truck applications.

Built to last

- Philips MasterDuty bulbs are the toughest lamps for medium and heavy duty vehicles.
- Designed to withstand extreme stress and vibration.
- Vibration resistance is key to ensure the duration of MasterDuty bulbs.
- Up to 13G resistant.

Xenon HID

Xenon HID lights deliver up to twice as much light as halogen bulbs but consume less power.

Original equipment quality

Philips is a world leader and innovator in the design, development, and production of Xenon HID lighting. The Xenon HID bulbs we sell as replacement lighting are the same quality as those we supply to vehicle makers around the world.

Xenon HID

CrystalVision platinum

Premium upgrade headlight bulbs.
Powerful performance, brilliant white light.

New!

For drivers who want a bright and stylish driving experience.

Philips **CrystalVision platinum** premium upgrade headlight bulbs deliver a sharp, irresistible look. A new patented, ultra-white gradient coating creates up to 4000 K white light.

- High-performance filament
- Up to **60% more vision*** for a safer drive
- DOT compliant

Available in:

9003, 9004, 9005, 9005XS, 9006, 9006XS, 9007, 9008, 9012, 9145, H1, H3, H7, H11, H11B, PS24WFF, PSX24W

NightGuide platinum

Premium upgrade headlight bulbs.
Improved performance for your driving safety.

New!

Up to 130% more vision* compared to a standard halogen bulb.

Philips NightGuide platinum premium upgrade headlight bulbs improve visibility at night and enhance driver comfort by reducing fatigue. Projecting light farther ahead gives drivers more time to react for safer driving.

- Innovative high performance beam
- Cool beam color – up to 3400 K
- DOT compliant

Available in:

9003, 9004, 9005, 9005XS, 9006, 9006XS, 9007, 9008, 9012, H1, H7, H11, H11B

X-tremeUltinon LED lighting

LED headlights and fog lights. Brighter. Whiter. Stronger.

New!

Philips X-tremeUltinon are our brightest LED upgrades

- Deliver **up to 5800 K arctic white light** for high-end styling that is noticeably whiter than standard
- Direct replacement for conventional halogen bulbs
- Patented **SafeBeam** technology eliminates glare to other drivers
- Patented **AirBoost** technology optimizes cooling
- **Automotive Grade** design and construction with rugged driver electronics built into the LED base
- Compact design makes installation easy
- Built-in resistor eliminates false light out warnings in H4, H7, HB3/HB4
- Integrated capacitor eliminates flickering in H4, H7

Available in CANADA ONLY

LED Headlights: 9005, 9006, 9012, H1, H3, H4, H7, H11
LED Fog: H8/H16

Ultinon Essential LED lighting

New!

LED headlights and fog lights. Stylish white light on the road.

New Ultinon Essential LED headlights and fog lights provide the best value for your money, with a compact all-in-one design featuring powerful brightness, stylish looks, dual heat dissipation technology, and 12V/24V compatibility.

One-piece design, with integrated driver box electronics in the body, facilitates easy fit and installation.

- Up to 6500 K color temperature
- Compact design that fits a wide range of car models
- **Available in Canada:**
H1, H3, H4, H7, H9, H11, 9004, 9005/9006, 9007, 9008, 9145, 9012 Headlights, and PS24W, and H8/H16 fog lights.

- **Available in USA:**
Fog only: H7, H8/H16, H11, 9006, 9145, and PS24W

LED integral beam

Powerful cool white light. See farther down the road.

High tech look

- More durable than a conventional sealed beam, with increased lifetime
- Wider versatility – compatible with 12V and 24V systems
- Brighter and whiter than conventional halogen lighting
- DOT compliant

Headlight Restoration Kit

With UV Protection – See clearly. Drive safer.

UV protection formula provides two years of protection from re-hazing.

Yellow, hazy headlight lenses are an eyesore and a danger to you and your passengers. Philips Headlight Restoration Kit takes the haze away, restoring the headlights to like-new condition.

Compared with other kits that require power tools,

our advanced technology delivers excellent results with minimal effort and is extremely simple to use. In four easy steps, you can achieve professional results.

Philips offers high quality products for more safety, and the Philips Headlight Restoration Kit helps make the most of your driving experience.

Part number: HRK00XM

Can Be Used on:
Headlights | Taillights
Turn Signal Lights and
Reflective Lens Covers

Ultinon LEDs

Brilliant performance in three colors for interior & exterior applications

Direct replacements for conventional bulbs

- Stylish, distinctive look
- Long lasting and energy saving LEDs
- Excellent light diffusion
- Automotive grade quality, designed and built for reliability and durability
- Instant-on performance gives following drivers more time to react safely to turning or braking
- OEM-style lens protects LED chip
- Up to 5,000 hours lifetime

Troubleshooting tip: If your Ultinon LED bulb doesn't light up when you first install it, take it out, flip it 180° and reinstall it. Some Ultinon LEDs require a specific polarity and you may need to rotate the bulb to get the polarity correct.

1. Remove the LED from the socket
2. Flip the LED 180°
3. Insert the LED back into the socket
4. Check to ensure the LED lights up

Do not force the LED or alter the socket.
Be sure that you have the right LED for your application.

Wedge-based LED

Festoon LED

LED CANbus adapters

Bulb failure detected

The simple, easy-to-install solution for eliminating common LED bulb issues.

LED upgrade lights are great. They're rugged, they last far longer than conventional bulbs, and they offer brilliant illumination. But in some vehicles, they can also trigger a false bulb failure warning.

Avoid false bulb failure warnings by installing the Philips LED CANbus Adapter.

Some cars use the vehicle's computer network (CANbus) system to verify the functioning of the vehicle's lights. Because LED bulbs have a lower wattage and draw much less power than conventional bulbs, when the system runs a check, the electrical resistance of an LED may be too low to be detected.

This creates a false warning that one of the lights has failed. Philips LED CANbus Adapters help prevent false bulb failure warnings.

In addition, a lot of auto manufacturers use PWM (or pulse width modulation) to precisely control the voltage to a bulb. One of the benefits of doing this is to improve bulb life.

These quick, voltage pulses (PWM) do not give a bulb filament time to cool down and dim, so for halogen bulbs the pulses are not noticeable.

However, with an LED bulb, these pulses are enough to turn the LEDs off and on very quickly, which results in a flashing of the light.

Philips CANbus adapters eliminate any issues introduced when installing an LED in place of a halogen bulb. Installation of the adapters takes just minutes.

Philips LED Headlight and Fog Light CANbus Adapters are available in:

| Part No. | Application |
|-------------------|---|
| CANbus H7 | Headlight (H7), Fog Light (H7) |
| CANbus H8 H11 H16 | Headlight (H11), Fog Lights (H8, H11, H16) |
| CANbus HB3 HB4 | Headlights (9005, 9006, 9012), Fog Light (9006) |
| CANbus H4 | Headlight only (9003) |

Coming soon: Fog Light CANbus Adapters for 9145 and PS24W

Philips LED CANbus Adapters for interior & exterior bulbs are available in:

| Part No. | Application |
|------------|--|
| CANbus 5W | For use with interior and exterior LED applications (other than headlights and foglight) |
| CANbus 21W | For exterior LED applications |

See charts on previous page for more info.

Troubleshooting tip: Some CANbus systems treat low power consumption of bulbs as a sign of a burned-out bulb, which causes a warning on the dashboard. Since LED bulbs consume much lower power than the original incandescent bulbs, they can trigger this warning in some vehicles.

Installing the Philips CANbus adapter in the circuit eliminates this problem. Installation takes only minutes.

CANbus adapter is installed in parallel with the corresponding LED bulb.

Philips GoPure GP5212

Automotive Filtration Technology

Breathe clean air on the go!

The Philips GoPure GP5212 is an air purifier that can easily remove up to 100 different types of pollutants including allergens, viruses, bacteria, and exhaust gases. It also neutralizes unpleasant odors inside vehicles.

GoPure GP5212 air purifier is the solution for those who want "Healthy Air on the Go!"

*Tested particle 1-pass removal efficiency at 3rd party lab on SelectFilter Plus. Particle removal efficiency is tested according to standard GB/T6165:2008. Actual performance can be influenced by the environment it is used in; the filter does not guarantee 100% removal of particles. Bacterial removal rate tested at 3rd party test laboratory on Staphylococcus Aureus killing rate, according to GB21551.3-2010. Tested according to GB/T18801-2015 in 3 m³ chamber during 20 minutes for PM2.5 and 60 minutes for gases.

Philips GoPure GP5611

Advanced Automotive Air Purifier

Goodbye airborne microbes. Breathe healthy air.

The GoPure GP5611, with its advanced SaniFilter Plus and UVC light, removes and deactivates viruses and bacteria. In just 5 minutes, it safely eliminates 99.9% of microbes through UVC light* While the HESAMax technology removes chemicals and odors 24/7.

Simply slide the GoPure GP5611 into a cup holder and connect the USB-C power cable. Once connected with this 5V cable the device turns on and works automatically. The stylish, contemporary and compact design will also look great in your car.

Xperion 6000 LED work lights

Philips Xperion 6000 LED work lights were conceived, engineered, and built for auto service professionals.

- State-of-the-art Philips Xperion LED chips
- Incredibly rugged construction with excellent resistance to impacts, water, and solvents.
- Innovative features such as 360° rotating hooks, hinged light panels, and multiple illumination modes
- Designed to deliver years of reliable service and brilliant illumination

Xperion 6000 UV Pillar Advanced lighting performance that lasts

Our premium work light, the Philips Xperion 6000 UV Pillar, is a multi-purpose work light with several powerful light sources, UV light, high CRI and long-lasting battery.

Strong magnet and 360° rotatable hook

Precision light with ergonomic design and wide beam angle

High CRI95 and unique UV light

Xperion 6000 Pillar Work all day on a single charge

The Philips Xperion 6000 Pillar LED work light lasts all day on a single charge. Its bright 250 and 500 Lumens main light and built-in 180 Lumens spotlight will meet multiple needs. Foldable for easy carrying and adjustable lighting angles.

Strong magnet and 360° rotatable hook

Precision light with ergonomic design and wide beam angle

Long operating time in different light modes

Xperion 6000 Pocket The compact but powerful light

The compact, powerful Philips Xperion 6000 Pocket is perfect for confined spaces with an ultra-flexible 100 Lumens, 10 inch hose spotlight. Its wide-beam light up to 300 Lumens in Boost mode gives you the bright light you need.

Strong magnet and 360° rotatable hook

Precision light with ergonomic design and wide beam angle

Long operating time in different light modes

Xperion 6000 Slim Perfect for narrow spaces

The versatile Philips Xperion 6000 Slim is ideal for narrow spaces. Featuring 250 Lumens in Eco and 500 Lumens in Boost mode, its unique 270° rotating light module helps you direct the powerful beam where you need it.

Multi Dock Station

Docking station for charging multiple devices

The Philips Multi Dock Station can charge two devices at a time.

- LED indicator to show charging status
- Dedicated space for the Find My Device remote control
- Compatible with Philips Xperion 6000 UV Pillar, Pillar, Pocket and Slim

Find My Device

A handy way to find misplaced devices

With the Philips Find My Device accessory, you can use the remote control to trigger an audible buzzer and a flashing light, to find most lost Philips Xperion 6000 devices. It works up to 32+ feet.

- Find My Device is sold separately for UV Pillar, Pillar, and Slim models
- Use the Find My Device to locate your misplaced Philips Xperion UV Pillar, Pillar, and Slim work lights

Understanding Philips **ordering codes**

All our automotive lighting products can be ordered using **Philips Order Entry**.

With Philips Order Entry you can identify the **1 lamp type**, the **2 product range** and the **3 packaging type**.

1 Lamp type

Every **lamp type** is designated by Philips with a unique number. (See next page for examples.)

2 Range types

Most lamp types are available in different packaging that is linked to color codes (PR – Vision, blue; VP – VisionPlus, violet; NGp – NightGuide platinum, dark purple etc.).

& Exterior Lighting

LED Integral Beam

Ultinon Essential LED
Headlights and Fogs

X-tremeUltinon LED
Headlights and Fogs

*Important: LED headlights
not for sale in the USA;
sold in Canada and Mexico only.*

*Important: LED headlights
not for sale in the USA;
sold in Canada only.*

3 Packaging types

Single blister
Material:
blister/plastic
Contents: 1 lamp
Packaging type: **B1**

Double blister
Material:
blister/plastic
Contents: 2 lamps
Packaging type: **B2**

Commercial Pack
Material: carton
Contents: 1 lamp (**C1**)
Contents: 10 lamps (**CP**)
Packaging type: **C1/CP**

Sealed Beam
Material: carton
Contents: 1 lamp
Packaging type: **C1**

LED Integral Beam
Material: carton
Contents: 1 lamp (**X1**)
Packaging type: **X1**

Special Pack
Material: carton
Contents: 2 lamps (**X2**)
Packaging type: **X2**

Special Pack
Material:
windowed carton
Contents: 2 lamps (**S2**)
Packaging type: **S2**

Philips suffix explanation: B1 = Blister pack of 1 bulb B2 = Blister pack of 2 bulbs

C1 = Commercial box packaging of 1 bulb S2 = Special pack (windowed carton) of 2 bulbs

Lighting technology explained

■ Asymmetrical beam pattern

An offset beam pattern for low beam applications. Provides a longer beam in the lane of travel rather than in the opposite lane, which avoids blinding drivers in oncoming traffic.

■ Ballast

The electronic driver that controls a Xenon HID bulb.

■ Base

Bottom part of the bulb which ensures a proper mechanical and electrical connection with the lamp unit of the car. Its precision is important for a correct beam pattern.

■ Board voltage

Electrical voltage in the board net of the vehicle. In cars, the operational voltage at the bulb connector typically varies between 13 and 14 volts (V). The official test voltage for halogen headlight bulbs is 13.2 V according to ECE R37. For trucks with a 24 V board net the test voltage is 28 V. The board voltage has a significant impact on filament bulb lifetime. In general, a 5% voltage increase reduces the lifetime by 50%.

■ Burner

Burner is the glass part of a halogen or Xenon HID bulb in which the light emission is generated. It consists of hard or quartz glass and contains the filament and the two electrodes.

■ CANbus (Controller Area Network Bus)

A computer network that connects systems in modern vehicles. Any component on the network can send and receive data using the CANbus.

■ Candela (cd)

Unit of luminous intensity that measures the amount of luminous power emitted by a light source in a particular direction.

■ Color temperature

Thermal measure for light color. Derived from the color emitted by a "black body" which is heated up to a certain temperature (see also Kelvin).

■ Cut-off zone

The line between the bright and dark zones of low beam light. Above the cut-off zone, the amount of light is limited in order to avoid blinding oncoming traffic.

■ D(...)

Nomenclature for Xenon HID bulbs where **D** stands for "discharge." Available technical types: **D1S**, **D1R**, **D2S**, **D2R**, **D3S**, **D3R**, **D4S**, **D4R**, and **D5S**.

D1 and **D2** First bulbs introduced in 1991

D3 and **D4** Mercury-free bulbs that replace D1 and D2

For D1 and D3, the electronic high-voltage starter is already integrated in the bulb base. The **S** type is used with projector

(lens) systems. Version **R** is used in open reflectors and features an additional coating on the outer tube (pinstripe) which blocks out some areas to avoid glare.

The **D5S** is a 25-watt bulb with integrated starter and integrated ballast.

■ Discharge bulb

The correct, technical term of the so-called Xenon bulb is **high-intensity discharge** bulb. The light is emitted by an electric arc which is produced between two electrodes.

See also HID and Xenon light.

■ DOT

The United States Department of Transportation which oversees federal highway, air, railroad, maritime and other transportation administration functions. It fulfills a role similar to the Economic Commission for Europe (ECE).

■ DRL

Daytime Running Lights.

■ Electric arc

The connecting luminous discharge between the two electrodes of a Xenon HID bulb. This is similar in principle to a bolt of lightning. The electric arc is created by the high-voltage starter and stabilized and controlled by the ballast.

■ Electrodes

Electrical conductors which are positioned opposite each other in the vessel of a Xenon gas-discharge bulb. The electric arc that emits light is produced between the electrodes.

■ E-mark

The ECE mark of approval. The digit following the "E" indicates in which country the approval has been granted. For example: E1 indicates Germany and E2 indicates France. An approval granted by one ECE member is valid for all member states and is typically adopted by national regulations. Single minor deviations are possible.

■ Festoon

A tube-shaped bulb with contacts at each end such as 12844, which is commonly used for interior and license plate lighting.

■ Filament

A coiled tungsten wire that emits light.

■ H(...)

Nomenclature for halogen bulbs. H = halogen. The bulbs are numbered consecutively. The most common types are:

H1 First halogen bulb (single filament).

9003/H4 Double filament for both low beam and high beam application in one headlamp unit.

H7 Most common halogen bulb for low beam, high beam, and fog lighting.

■ Halogen

A gas that is used to create the halogen cycle process in a light bulb. During operation, tungsten molecules evaporate from the tungsten wire. In the cycle process, they combine with the halogen molecules and fall back to the wire. This extends the lifetime of a bulb and allows operation at a higher intensity. Halogen bulbs contain a high-pressure halogen filling. Non-halogen incandescent bulbs often use a vacuum.

■ HB(...)

ECE name of original North American bulb types which were approved for use in Europe as well. For example: HB3 refers to 9005 and HB4 refers to 9006.

■ Hg

Symbol for mercury (Latin: hydrargyrum). Xenon bulb types D1 and D2 still contain approximately one third of the amount of mercury as a normal domestic energy-saving bulb. D3, D4 and D5 are completely mercury-free.

■ HID

High Intensity Discharge. Correct technical name for a so-called Xenon bulb.

See also gas-discharge bulb, Xenon light, Xenon system.

■ High-voltage starter

Creates high voltage pulses of approximately 20,000 volts to ignite the electric arc in a Xenon HID bulb.

■ HiPerVision

Very compact signaling-bulb range with high-precision filaments and a long lifetime. For use in signaling lights, fog lamps, rear and daytime running lights.

■ Illuminance (lux)

Contrary to luminous flux (lumen), which is a measure of the total amount of light emitted by a light source, illuminance describes the amount of luminous flux per unit area, such as on the road. This is measured with a lux meter.

■ Kelvin (K)

A unit of measure of temperature based upon an absolute scale whereby zero (minus 459.4 °F) represents the point where all thermal motion ceases. In lighting, however, this is a measure of color temperature. The higher the color temperature, the whiter and cooler the light appears.

■ LED (Light Emitting Diode)

LEDs are semiconductor light sources that emit light when current flows through them. Electrons in the semiconductor release energy in the form of photons. LEDs have many advantages over halogen bulbs, including lower energy consumption, longer lifetime, improved physical robustness, smaller size, and instant-on switching.

■ LED CANbus Enabling Adapters

Systems designed to prevent false warning signals from the dashboard for some 'CANbus system equipped' cars after replacing original incandescent bulbs with LED bulbs.

■ Lifetime

Statistical data that indicate the failure rate of a percentage of bulbs operated at a specific voltage over a certain period of time. Common lifetime data indication:

B3 Time when statistically 3% of the test samples have failed

TC Time when 63% of the test samples have failed.

■ Luminance

The intensity of light emitted from a surface per unit area in a given direction from, for example, the filament or the electric arc of a Xenon HID bulb. An important indicator of the amount of light a headlamp unit provides on the road. The unit is candela/m² (cd/m²).

■ Lumen (lm)

Unit of luminous flux.

■ Luminous flux (lumen)

The total amount of light that is emitted by a light source in all directions.

■ Lux (lx)

Unit of illuminance. 1 Lux = 1 lm/m².

See also Illuminance.

■ Lux meter

Illuminance measuring device.

■ Pb

Symbol for lead (Latin: plumbum).

All Philips automotive bulbs are **lead-free**.

■ Quartz glass

Temperature and pressure resistant glass for halogen and Xenon HID bulbs. The glass also has a special coating to block out harmful ultraviolet (UV) light.

■ Tungsten

Filament and electrode material.

■ UV-block

Ultraviolet (UV) blocking glass absorbs the UV light created by the filament or the electric arc. UV block is mandatory for all ECE complying car bulbs because UV light can damage the plastic cover of the headlamp.

See also Quartz glass.

■ Wedge base

Bulb with a glass base, such as 3157. Mainly used for parking lights, side indicators, and interior lighting.

■ Xenon (Xe)

One of the noble gases. Commonly used to refer to HID bulbs.

■ Xenon light

Headlights with HID bulbs.

See also D(...), Discharge bulb, HID.

■ Xenon system

A complete Xenon system consists of the HID bulb, the high-voltage starter and the electronic ballast which controls the electric arc.
